

Qing Fei Pai Du Tang. The Chinese herbal formula that combats 2019 novel coronavirus pneumonia

By Geoff D'Arcy Lic. Ac., DOM.

(Published in the Townsend Journal, Today's Practitioner and Positive Health)

- “The National Health Commission of the People’s Republic of China together with the National Administration of Traditional Chinese Medicine recommended “*Qing Fei Pai Du Tang*” for the treatment of COVID-19.
- “Nearly all confirmed patients in Shanxi in the coronavirus COVID 19 pandemic have taken it.”
- “The results showed that the total effective rate of clinical treatment of 214 patients was more than 90%. “

According to The State Council of the PRC, Chinese Medicine (TCM) has gained enormous experience helping to “treat 85% of all (83,000) coronavirus infections in China” According to Liú Qīngquán the director of the Beijing Traditional Chinese Medicine Hospital, and a member of the team dispatched to Wuhan. TCM had been used in roughly 9,600 COVID-19 cases across the country as of February 10”. “After analyzing case reports from different areas, we have reached a conclusion that TCM is able to prevent mild cases from getting worse,” Liu said.

He went on to comment “Let Western medicines take the lead and TCM be a supplementary treatment,” adding that while TCM can’t kill the virus, it instead can enhance people’s immune systems.

There are a few Chinese herbal formulas that have risen to the top of the Chinese experience of treating this Coronavirus and its progression into the deeper and gravely serious COVID 19 pneumonia. One of the star formulas to emerge from this massive experience is the *Qing Fei Pai Du* formula. The formula QFPDT was applied in the battle against COVID 19, but it’s unavailable in the USA as a formula because the US FDA (Food & Drug Administration) has severe restrictions on the sale of Ma Huang and has made Xi Xin a banned herb. The formula with 2 substitutes (for the banned herbs) and all the rest of its other 19 ingredients can be separately sourced and blended.

According to Dr. Huang Huang at the most respected TCM school in China, Nanjing University of Chinese Medicine. “**The National Health Commission of the People’s Republic of China together with the National Administration of Traditional Chinese Medicine recommended “*Qing Fei Pai Du Tang*” for the treatment of COVID-19.** *Qing Fei Pai Du Tang* consists of a combination of formulas that have been used for thousands of years and whose use has been supported both by classical texts and by the clinical experience of later physicians. “

There are four classic Traditional Chinese herbal formulas, that are combined into one (QFPDT) They all originated from the vast experience that Chinese Medicines have had with explosive epidemics ever since they were written about in the Shang Han Lun (A.D 219) which is among the oldest complete clinical textbooks in the world, TCM have been fighting epidemics and pandemics and recording them for thousands of years.

Fig. 2 The composition of the prescription—Qing Fei Pai Du Tang

Mid way through the Coronavirus crises in Hebei, came the recommendation that a TCM prescription of QFPADT, be used for lung clearance and detoxication to treat coronavirus patients. **Nearly all confirmed patients in Shanxi in the coronavirus COVID 19 pandemic have taken it.**

Reported February 23rd 2020 the “State Administration of Traditional Chinese Medicine carried out clinical observation of QFPADT in the four provinces of Hebei, Shanxi, Heilongjiang and Shaanxi for the treatment of confirmed patients. **The results showed that the total effective rate of clinical treatment of 214 patients was more than 90%. “**

This prescription QFPDT is not only suitable for patients with new, mild, common, or severe neonatal pneumonia, it can also be reasonably used in the treatment of critically ill patients in combination with Western Medicine and can also be used for patients with common cold and flu.

In one study announced by China’s State Administration of Traditional Chinese Medicine, 701 confirmed coronavirus cases treated by QFPDT were analyzed. The 701 cases spanned 57 medical institutions in 10 provinces. Out of the 701 patients, 130 were cured and discharged; symptoms of 51 patients completely disappeared; 268 patients showed improvement in symptoms, and 212 presented with stable symptoms (those symptoms did not worsen).

Fever: Before taking QFPADT the herbal decoction was taken for just one day, 51.8% of the patients returned to normal temperature. After taking the remedy for six days, 94.6% of patients’ temperatures returned to normal.

Cough: And out of the 701 cases, 214 patients presented with cough symptoms. After one day of taking Qing Fei Pai Du Tang, 46.7% of the patients’ cough symptoms disappeared. After six days, that figure increased to 80.6% of patients.

Fatigue Poor Appetite and Sore Throat: TCM doctors also observed taking *Qing Fei Pai Du Tang* lessened the severity of other symptoms such as fatigue, poor appetite, and sore throat.

Of the 701 patients, detailed, completed case information of 351 patients has become available. And out of the 351 patients, none of the patients categorized as “light and ordinary” (i.e., mild) were downgraded to severe or critically ill; 3 of the 22 severe patients were cured and discharged; 8 were improved to general condition, and a total of 46 patients were cured and discharged.

According to the theory of TCM, the target organ location of COVID-19 are the Lungs, and the etiology attribute is “damp and toxin pathogen”. The network pharmacology analysis showed that QFPDT has an overall regulatory effect via multi-component and multi-target. The primary site of pharmacological action is the lung, as 16 herbs to lung meridian, which indicated that the decoction is mainly specific for lung diseases.

Among the potential targets screen, most of them co-expressed with ACE-2, the receptor of COVID-19, indicating the potential improvement of COVID-19. It can inhibit the replication of COVID-19 by acting on multiple ribosomal proteins. COVID-19 can lead to strong immune response and inflammatory storm. Functional enrichment analysis showed that QPD could inhibit and alleviate excessive immune response and eliminate inflammation by regulating immune related pathway and cytokine action related pathway]. Furthermore, through the prediction of molecular docking, it was found that patchouli alcohol, ergosterol and shionone in the formula had better anti-COVID-19 effect, which provided new molecule structures for new drug development.

“The treatment of COVID-19 showed that early intervention of TCM is important to improve cure rate, shorten the course of disease, delay disease progression and reduce mortality rate. Furthermore, the reason why TCM works is not only to inhibit the virus, but might block the infection, regulate the immune response, cut off the inflammatory storm, and promote the repair of the body.”

Dampness: Almost everyone in TCM agrees that dampness is at the core of this disease. Nearly all of the cases encountered so far in China have display a thick, white, sticky tongue coating.

In TCM every patient’s individual constitution is different and receives the virus in different reaction patterns. TCM ideally prescribes herbs to supports the variations of constitutions and their different responses. Ideally herbal formulas are amended to the individual. The commonly identified in TCM pattern: External pathogen attacking the exterior, pathogen constrained with heat formation. Unresolved, exterior wind-cold which has become constrained and is transforming into heat

The formula can also be used for patients with the common cold and flu. However, this formula is a disease treatment prescription, and it is not recommended to be used as a preventive prescription.

Dosage: 3 capsules 3 times per day.

Ingredients in USA, Qing Fei Pai Du Tang

Morus Alba	Sang Bi Pi	Mulberry Root Bark	9g
Radix Glycyrrhizae Preparata	Zhigancao	Liquorice Root (processed with honey)	6
Semen Armeniacae Amarum	Kuxingren	Bitter Apricot Seed	9
Gypsum Fibrosum	Shigao	Gypsum	15
Ramulus Cinnamomi	Guizhi	Cassia Twig	15
Rhizoma Alismatis	Zexie	Oriental Waterplantain Rhizome	9
Polyporus	Zhuling	Chuling	9
Rhizoma Atractylodis Macrocephalae	Baishu	Largehead Atractylodes Rhizome	9
Poria	Fuling	Indian Bread	15
Radix Bupleuri	Chaihu	Chinese Thorowax Root	16
Radix Scutellariae	Huangqin	Baical Skullcap Root	6
Rhizoma Pinelliae	Banxia	Pinellia Tuber	9
Radix Asteris	Ziwan	Tararian Aster Root	9
Rhizoma Zingiberis	Ganjiang	Dried Ginger	15
Rhizoma Belamcandae	Shegan	Blackberrylily Rhizome	9
Rhizoma Dioscoreae	Shanyao	Common Yam Rhizome	12
Fructus Aurantii Immaturus	Zhishi	Immature Orange Fruit	6
Pericarpium Citri Reticulatae	Chenpi	Dried Tangerine Peel	6
Agastache Rugosus	Huoxiang	Pogostemon Cablin Benth	9
Flos Farfarae	Kong Dong Hua	Coltsfoot Flower Bud	9
